

1/4" VALVE INSTALLATION INSTRUCTIONS

1/4" VALVE

INSTALLING THE VALVE

1 The 1/4" Hudson Valve has 1/4" female threads. To connect the valve, you will need a 1/4" water line coming in with male threads.

Diagram A

- 2** You can use flexible hosing for the water source, but the valve must be mounted stably in the application.
- 3** Use plumber's tape on threads of water supply pipe, then screw on Hudson Valve. Hand tighten only. **DO NOT USE PIPE COMPOUND**
- 4** Turn water source on full volume.
- 5** Valve will shut off approximately 1/2" up from the bottom of the valve.

Optimal operating pressure 4-80 psi

Maintenance: The valve should be routinely cleaned to prevent buildup of debris inside the valve. Visit our website for complete instructions.
